

PROFESSIONAL SUMMARY

Seasoned Full Stack Software Engineer with **7+** years of proven expertise in designing, developing, and deploying scalable high-performance applications. Proficient in modern JavaScript frameworks (Node.js, React, Vue.js) and cloud infrastructure (AWS). Demonstrated track record of leading agile teams, optimizing database performance, and delivering impactful business solutions.

SKILLS & CERTIFICATIONS

- **Backend:** Node.js, Express.js, REST APIs, Microservices Architecture
- **Frontend:** ReactJS, Vue.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Single Page Applications (SPAs), Component Design
- **Databases & Caching:** PostgreSQL, Redis, MySQL, Database Optimization, Query Performance Tuning
- **Message Queues & Event Processing:** RabbitMQ, Event-Driven Architecture, Asynchronous Processing
- **Cloud & Infrastructure:** Amazon Web Services (AWS), EC2, S3, Lambda, CloudWatch, RDS
- **Data Warehouse:** Amazon Redshift, Data Analytics, SQL Analytics
- **Tools & Others:** Git, Docker, CI/CD Pipelines, Linux, JIRA, Agile/Scrum, TypeScript, Java, Python, Webpack, Jest, Puppeteer, Machine Learning basics with PyTorch and Scikit-learn

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Foundry (IDG) | USA

Jan 2021 – Aug 2025

- Led the development of ABM Platform which enabled marketers to build a user experience based on the target audiences and personalized landing pages using Node.js, React & Vue.js which increased customer conversions by **20%** and **50%** more web visits, generating an estimated **\$1.5 million** additional revenue for the company.
- Optimized PostgreSQL database performance by redesigning 10+ complex queries and implementing strategic indexing, reducing query execution time by **55%** and improving data fetching of **500 million** records.
- Performed thorough code reviews to enforce coding standards, leading to improved robustness, dependability, and maintainability of the software infrastructure. Worked with cross-functional teams to create software solutions that enhanced customer experience and significantly improved overall functionality and performance by **10%**.
- Designed and implemented Chrome extensions that integrate with third-party customer relationship management tools, offering features for account activity monitoring and web content personalization.
- Worked on the marketing orchestrator application that allows marketers to create, build, and organize their ABM marketing campaigns using Vue.js, React & Node.js, integrating data from PostgreSQL and Redshift, resulting in improved sales tactics globally and contributing to a **\$1 million** increase in revenue.

Software Engineer | Accenture Solutions Private Limited | India

Dec 2016 – June 2019

- Spearheaded the development of a Supply Chain Tool analytics application using Vue.js and Node.js, implemented redis caching layer which resulted in a **40%** reduction in time required to access earnings forecasts across 60 global market operations.

EDUCATION

M.S. in Electrical Engineering and Computer Science, University of California Merced | USA

May 2021

- **Coursework:** Advanced Algorithms, Distributed Computing, Parallel Computing, Computer Vision, Advanced Computer Vision, Cloud Computing, Approximation Algorithms

B.Tech. in Computer Science, JECRC University | India

Aug 2016

- **Coursework:** Data Structures and Algorithms, Software Engineering, Database Systems, Operating Systems, Design and Analysis of Algorithms, Data Mining, Object Oriented Design
